

COMPEX™ CMX-B10
Breather Fabric

Ideally suited to ambient and high temperature applications.

FEATURES & BENEFITS

- Medium weight polyester breather fabric with excellent all round stretch and drapeability.
- Excellent multi-directional stretch for use with complex shape components.
- Can be used effectively in single or multiple layers.

PRODUCT VARIANTS

Also available in grey. Also available in synthetic fibres (viscose).

PROPERTIES

Maximum use temperature	204°C / 400°F
Color	White
Fiber	Polyester
Weight	150g/m ² / 4.5oz/yd ²

CMX-B10 has no release characteristics and should be separated from the laminate by a suitable porous release fabric or film. CMX-B10 is not intended to be used as a breather material alone in high pressure autoclave cures.

AVAILABILITY

Standard Width	Up to 1.52m	Up to 60in
Standard Length	Up to 100m	Up to 109yd
Cut shapes/slit widths	Available to order	

STORAGE

No special storage conditions required.

HEALTH & SAFETY

Please refer to the product MSDS for safe handling, personal protective equipment recommendations and disposal considerations.
