

COMPEX™ CMX-F10
Release Fabric

Ideally suited to flat or single curvature applications.

FEATURES & BENEFITS

- A non-porous, PTFE coated glass release fabric.
- Imparts a smooth finish on the laminate surface.
- Impervious, smooth and will release from all commercial resin systems without migration.
- Suitable for use in extreme process conditions such as hydraulic presses, autoclave and vacuum bag cures.
- Ideal as a multiple use release liner during the protection of flat or single curvature composite parts.
- Graphite loaded, antistatic grade available.

PROPERTIES

Maximum cure temperature	320°C / 608°F
Color	Brown
Fabric type	Glass
Fabric weight	490g/m ² / 14.45oz/yd ²
Release coating	PTFE

AVAILABILITY

Standard width	Up to 1.52m	Up to 60in
Standard length	30m	32.8yd
	Slit widths available	

STORAGE

No special storage conditions required.
