

COMPEX™ CMX-F25W
Release Fabric

Ideally suited to reusable edge breather applications.

FEATURES & BENEFITS

- Heavy weight PTFE coated glass fabric mesh, normally used as a reusable edge breather around the periphery of tooling.
- Plain weave with 2x2mm (0.08x0.08in open mesh pattern).
- Resistant to chemical attack by even the most aggressive resin systems, ensuring a long life is achieved.

PROPERTIES

Maximum cure temperature	260°C / 500°F
Color	Brown
Fabric type	Glass
Fabric weight	520g/m ² / 15.34oz/yd ²
Release coating	PTFE

AVAILABILITY

Standard width	1m	1.09yd
Formats available	30m	32.8yd
	Slit widths available to order	

STORAGE

No special storage instructions.
