

COMPEX™ CMX-F5PM
Release Fabric

Ideally suited to flat or single curvature applications.

FEATURES & BENEFITS

- Medium porosity PTFE coated glass fabric.
- Ideal for use on flat or single curvature moldings.
- PTFE release coating ensures very easy release from the laminate without fear of contamination.
- High performance material designed for use in extreme temperature and pressure processing conditions.

PROPERTIES

Maximum cure temperature	320°C / 608°F
Color	Light brown
Fabric type	Glass
Fabric weight	130g/m ² / 3.83oz/yd ²
Release coating	PTFE

AVAILABILITY

Standard width	Up to 2m	Up to 78in
Standard length	50m	54.68yd
	Slit widths available	

STORAGE

No special storage conditions required.

HEALTH & SAFETY

Please refer to the product MSDS for safe handling, personal protective equipment recommendations and disposal considerations.
