

POLYCARBONATE SOLID SHEETS >

Flame Retardant (FR) Solid Sheets

Flame Retardant (FR) Polycarbonate Sheets

combine formability with excellent flame resistance properties and have usage in all public transportation vehicles. Especially in Airway and Railway.

Key Benefits

- High heat and flame resistance
- High impact strength
- Easily formable structure
- High resistance to many chemicals such as chemical liquids, paints and adhesives
- Transparent and opaque options

Application Areas

- All interior design applications, including seats and panels used in trains and aircraft
- All interior design for a wide range of vehicles
- Light diffusers used in the electronics industry
- Construction and building applications
